PROFFESIONAL SUMMARY

Final-year Industrial Design and Product Development Engineering student at the University of Cádiz (UCA). Highly skilled in advanced 3D modeling, mechanical component design, and the generation of standardized technical documentation and manufacturing drawings. Possesses strong spatial awareness and a meticulous approach oriented toward optimization and real-world fabrication and assembly criteria. Accustomed to project-based workflows and highly motivated to bring value to the structural and offshore sector in the DOSSA project.

EDUCATION

B.Eng. in Industrial Design and Product Development Engineering
University of Cádiz (UCA)

Timeline: 2022 - Present (Final year of studies)

Key Coursework: Fundamentals of Electronics, Engineering Graphics and Representation Systems, Technical Office.

TECHNICAL SKILLS

3D Design and Modeling: CATIA V5, SolidWorks, Blender (Advanced modeling, surface design, complex assemblies, and clash detection/interference analysis).

Technical Documentation and Drafting: AutoCAD (Generation of workshop drawings, part breakdowns, dimensioning, Bill of Materials [BOM], and application of technical engineering standards).

Digital Editing and Graphic Design: Adobe Creative Cloud (Photoshop, Illustrator, After Effects).

KEY TECHNICAL PROJECTS (Academic and Applied Experience)

Advanced 3D Modeling and Technical Breakdown Project High-Precision Device

Developed the complete 3D model of a complex high-precision peripheral (Logitech G305), focusing heavily on tolerance fits, ergonomics, and manufacturing feasibility.

Generated comprehensive standardized technical documentation and workshop drawings: exploded views, detailed cross-sections, graphic definition of components, and Bill of Materials (BOM).

Design & Product Development Project Technical Branding and Packaging

Conceptualized and engineered sustainable packaging solutions and visual identity for a premium olive oil brand.

Executed 3D modeling and structural design focused on minimizing material waste and optimizing industrial production processes.

ADDITIONAL EXPERIENCE AND TRANSFERABLE SKILLS

Freelance Digital Content and Branding Designer

Timeline: 2020 - Present

Designed and developed high-impact visual content for digital influencers and corporate branding for local businesses.

Key skills developed: Strict deadline management, seamless adaptation to client technical and stylistic requirements, and rigorous attention to visual and compositional detail.
